Inomize is a professional research & development company specializing in ASIC design and manufacturing of hardware and software solutions for OEMs & ODMs. The company enables the customer to get the maximum out of any given technology by pushing the technology to its limits, using the latest available tools, IPs, and practices to meet the customer's project needs. Inomize has R&D offices both in Israel and the UK. The company is a leading worldwide vendor providing analog IC, digital mixed-signal, ASIC, FPGA, and system design services to its international customers. Inomize successfully delivers cutting-edge projects in artificial intelligence (AI), augmented reality (AR), machine learning (ML), automobiles, industrial IoT, space and outdoor high-performance computing, networking, video, radar, lidar, communication, modem, medical, and consumer markets.

Inomize successfully delivers cut-edge projects in AI, Automotive, Communication, Medical, Industrial, Space and Aviation markets.

Inomize’s unique advantage is in the understanding of the overall technical system requirements, target market and limitations, paving the way to the best-in-class ASIC.

About Us
Inomize is a professional research & development company specializing in ASIC design and manufacturing of hardware and software solutions for OEMs & ODMs. The company enables the customer to get the maximum out of any given technology by pushing the technology to its limits, using the latest available tools, IPs, and practices to meet the customer's project needs. Inomize has R&D offices both in Israel and the UK. The company is a leading worldwide vendor providing analog IC, digital mixed-signal, ASIC, FPGA, and system design services to its international customers. Inomize successfully delivers cutting-edge projects in artificial intelligence (AI), augmented reality (AR), machine learning (ML), automobiles, industrial IoT, space and outdoor high-performance computing, networking, video, radar, lidar, communication, modem, medical, and consumer markets.

Inomize successfully delivers cut-edge projects in AI, Automotive, Communication, Medical, Industrial, Space and Aviation markets.

Inomize’s unique advantage is in the understanding of the overall technical system requirements, target market and limitations, paving the way to the best-in-class ASIC.
